

Dear Staff,

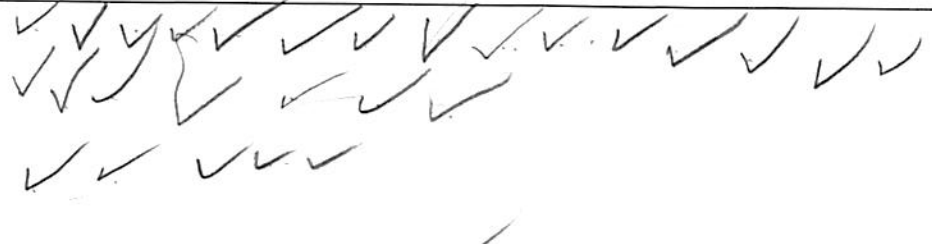

We, the grade 6-8 are completing challenges for the Canadian Energy Diet Competition and we need your help!

We are trying to calculate water consumption for two days and decided to pick how often the toilets in both staff washrooms get flushed. Below is a chart to check off each time someone flushes the toilet. All we need is a check mark beside the date.

Thank you for your help!

Sincerely,

Grade 6-8

February 8th  34	 A grid of approximately 10 rows and 15 columns filled with handwritten checkmarks. The checkmarks are arranged in several rows, with some rows being more complete than others. The total number of checkmarks is 27.	27
February 9th	 A grid of approximately 10 rows and 15 columns filled with handwritten checkmarks. The checkmarks are arranged in several rows, with some rows being more complete than others. The total number of checkmarks is 30.	30
