

Dear future Leanne:

IS the sky blue still? are polar bears still around? Are you saving energy still? IS the world ending? Right now the sky is blue still and polar bears are still alive. Are you driving now? if so **STOP** you have to save energy go for a walk. IS grass green still? how many trees are left? IS the world clean? Do people throw trash into the ocean still? How many animals went extinct that are your favourite? IS there still fish in the ocean? Are factories still using alot of energy and do factories put bad stuff into oceans still? If you work for a factory **QUIT NOW** you are wasting energy and polluting the ocean. Wich is super bad for the environment.
