

Dear future Emily

Here in the past, we have trees, oceans/sea, bugs, animals but no dinosaurs. There probably is still trees and clean water there in the future, but I am just asking. We go to school on Mondays, Tuesday, Wednesday, Thursday and Fridays and most people take the bus or walk. I actually took the bus this morning. We have normal cars but no flying cars yet. If there is any flying cars I hope it was you who made or invented them because that would be really cool! Here are some tips

Tips:

1. Walk instead of drive to places unless it is really cold
2. Turn off the lights when you leave a room
3. Turn off the water while you are brushing your teeth
4. Have a shower instead of a bath to save water
5. Unplug things you do not need plugged in
6. The most common one: Recycle!
7. Use a reusable water bottle
8. Use containers to hold your food for lunch
