

Phantom Power!

Many things that use electricity even use some power when they are turned off (but still plugged in). This is called “Phantom Power”.

Challenge!

Walk around your house and look at devices that are plugged into the wall. Make sure they are turned off. Do you see any “Phantom Power”?

Hint: Look for little lights on the device that stay on when you turn it off

Which Room?	Which Device?	Describe Any “Phantom Power” (make sure device is turned off, but still plugged in)
Living room.	TV.	I see a tiny red light.
Living room.	My dad’s laptop.	I see a white light.
Living room.	My brother’s Chromebook.	I see a tiny red light.
My room.	Google.	I see a white light.
Living room.	keyboard.	I see a green light.

Draw a map of your house and show where your family is using Phantom Power!
