

# Do I really need a nintendo switch ?

## Explanation/ Reasons:

I don't charge it anymore because it has a long lasting life. Plus I rarely use it that much cause I have an ipad to use . Next, the Nintendo isn't really fun if you don't have someone to play with. But my parents don't play with me . Especially since it's covid you can't invite people to your house to play. Also it's not really that fun, cause I don't really have a lot of games. I will only plug in when I feel like using it. It will save my parents money on their electrical bills.
