# Bread or Brot

The background of the slide features three thick slices of white bread stacked on top of each other. The bread has a golden-brown crust and a soft, porous white interior. The slices are slightly offset, showing the texture of the crumb.

Bread is prepared from a dough of flour & water usually by baking. Throughout recorded history it has been a prominent food in large parts of the world. It is one of the oldest man-made foods having been of significant importance since the dawn of agriculture & plays an essential role in both religious rituals & secular culture.

Bread may be leavened by naturally occurring microbial chemicals industrially produced yeast or high-pressure aeration. In many countries commercial bread often contains additives to improve flavor texture color shelf life nutrition & ease of production.
