- *Hot glue gun or Very strong glue to glue the lid with*
- *Hot water*
- *Name label from dollarama*
- *Markers to colour the blank label with*
- *Stickers (optional) or anything you love*

Panda Bank

Other ideas to reuse Recycled Materials

You need some cardboard and some glue. You can even use paper to make the process easier. Another thing is a piggy bank . You will need a water bottle and some scissors. Cut out a hole where the money can come in the piggy bank then paint the bottle horizontally and paint it with any animal that you want.

Another thing is a insect house. You will need a water bottle and some paint and some cardboard. You can do this by adding the card for a roof and cut out a area where thing bugs can come in and out. Then paint it to look like a little house. Another thing is a flower pot. First you need a flower pot and some paint you cut the top of the water bottle and paint into any animal you want to look nice ! Another thing is a bird feeder. You need a bottle and some bird seeds and some sticks . Then you add the seeds in the bottle and than birds can eat from it.
