

Why Nuclear is the Best!!!

A Green Powered Canada

I think that Nuclear is the best energy source!! Here are some reasons why I think that Nuclear is the best.

Firstly, Nuclear energy is reliable Unlike solar and wind energy which need the sun but Nuclear energy can be made anytime. So nuclear energy can be made non - stop!! That you can make Nuclear energy non -stop it means that more places will get energy faster.

Secondly, low-cost energy. Although building nuclear power plants has a high cost, it's relatively cheap to produce energy from them and they have low operating costs.

Thirdly,It generates more than 800 billion kilowatt hours of electricity each year. This avoids more than 470 million metric tons of carbon each year, which is the equivalent of removing 100 million cars off of the road.

Some people disagree with me because when making nuclear energy it pollutes the air but i think that the way the energy can spread to places faster than other energy sources.

Why Nuclear is the Best!!!
