

A Green Powered Canada

Think!

What are various types of energy produced in Canada?

Now based on what you said, fill in this chart

Renewable Energy	Non Renewable Energy

Think?

What are some benefits and drawbacks of each type of energy?

Your assignment

You will be assigned a different renewable source of energy for this project. (See the next page).

You must brainstorm and research where in the country these sources can be found, and to complete your [worksheet](#). Use [dochub](#) to write on this sheet. Turn this worksheet in on Google Classroom when you are finished.

Here's a [short video](#) that takes you through *dochubbing* your assignment.
