

A Green-Powered Canada

Name Room 9 Grade 1

Worksheet

Date _____

Energy source water (hydro)	
Type of resource (circle one) Renewable Non-renewable	
Definition energy that comes from moving water	
Benefits - use it over and over again - cleaner choice - better for our environment	Drawbacks - costs a lot of money to set up - need lots of space for making this energy - hurts the fish - might not have water close by to use
How is this energy source being used in Canada? - it is the most used source in Canada (over 60%) We looked at the Government of Canada website.	
What role could this energy source have in the future? probably still used because earth has lots of water	
Provide two reliable sources for people who would like to learn more about this energy source: Kids' Corner magazine (Ontario Power Authority) everykilowattcounts.ca/kids website mentioned but it does not exist anymore. The magazine still has good information, though. Renewable Energy Facts from Government of Canada website (https://www.nrcan.gc.ca/science-data/data-analysis/energy-data-analysis/energy-facts/renewable-energy-f)
