HOW TO SAVE ENERGY!

1. Turn off unnecessary light.

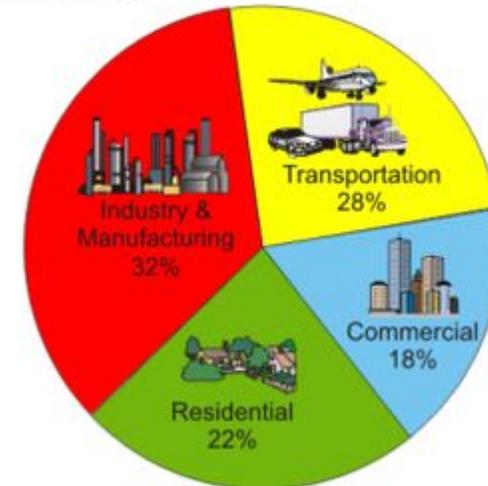

2. Ditch the desktop computer.

This is the history of energy!

What is the first source of energy? Energy has been around since the dawn of time. The first source of energy was the sun ☀️, as it provided heat and light during the day. People rose and slept during the night with the light, relied on wood and dung burning for heat, and water power to generate with basic mill.

Sector Uses The Most Energies:
Residential Use Of Energy

This is the energy problems.

Many issues arise from the use of energy: greenhouse gas emissions, acid rain, climate change, dependency on depleting supplies on fossil fuels - especially from politically unstable regions of the world

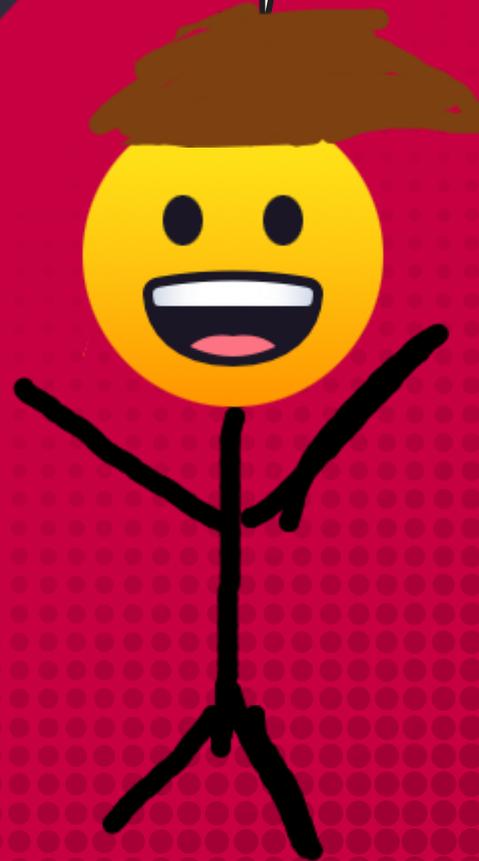

3. TAKE SHORTER SHOWERS ,
AND BATHS .

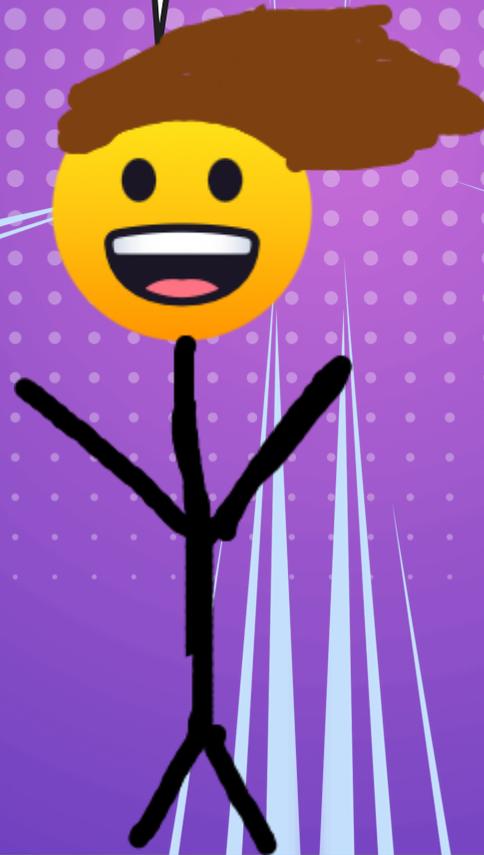

Task lighting provides increased light for specific tasks in a room that may already have some ambient light. Task lighting is especially useful for seeing small objects or objects with low contrast. For an example, a person who is using task lighting for homework or reading.

4. Use task lighting.

Turning on the faucet why'll brushing teeth and shaving is bad because, you are wasting water 💧 and you might need that water in the future. But, if you don't use the water why'll you are brushing your teeth or shaving you are saving energy!!!

5. TURN WATER OFF WHEN SHAVING, WASHING HANDS, BRUSHING TEETH.

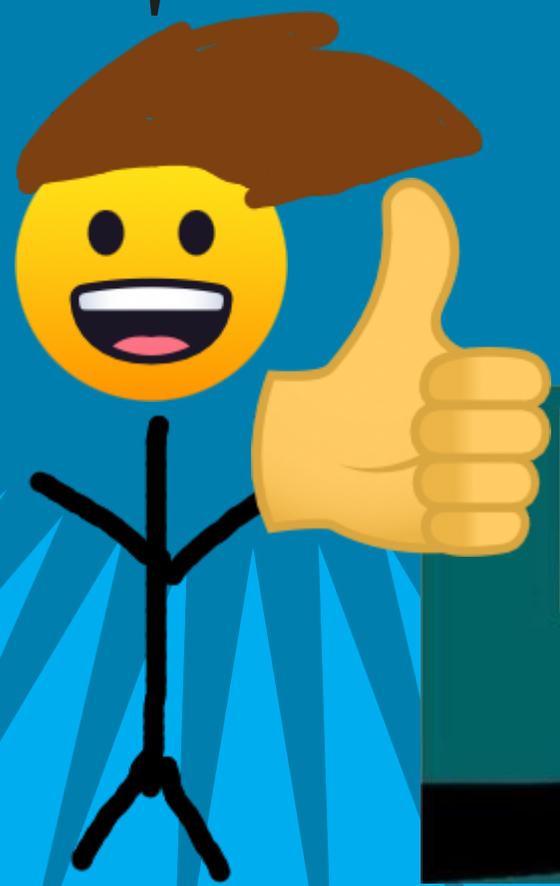

If you don't unplug your phone or any electronic something really bad will happen to you. Like some people, if you don't unplug your phone sometimes it will explode so, be careful, and help save energy!!!!!!!!!!!!

6. Unplug unused electronics .

If you don't turn on your air conditioner if you are not home you are wasting energy. But don't worry, if you turn off the air conditioner why'll you are going out you have to turn off the air conditioner to save energy!!!!

7. NOT HOME?
TURN OFF THE AIR
CONDITIONER.

Always turn the
Air conditioners
off when
not needed.

Air conditioners use about 150 times more power than lights.

If you have an old tv, you can recycle or you can fix it. And you can donate TVs!!! Just call the Salvation Army if you want to. And help save more energy!!!!

8. RECYCLE  OR DONATE THAT OLD TV.

It is best to put laundry in cold water. If you put cold water in the laundry, it uses less energy!!!! But hot water uses more energy!!!! So do not use hot water.

9. WASH LAUNDRY IN COLD WATER.

WASHING CLOTHES IN COLD WATER USES LESS ENERGY. BRRRRILLIANT!

It's Simple. Check Your Garment Care Labels.

The End! Hope you enjoyed my presentation!!! Bye!!!
