

Do you really need it

By Sophie and Rhyan

What energy powered source were giving up

We are giving up our computer. This will be a big thing because we can't do some school work without our chromebook.

Our experience.

Our experience was that the rest of you guys used your chromebooks and me and Sophie didn't use them. Some of the things we couldn't do on our computers were:

- We couldn't search for stuff for our indigenous project
- We couldn't go on quizlet after we finished french
- We couldn't go on epic after lunch for reading
- We couldn't do our french family video

What we learned.

We learned that you can go without a chromebook it is not necessarily a need but there are a lot of things you can't do with a pencil and paper. But there are also a wide variety of thing you can do with paper and a pencil. Like...

- Read instead of french family video
- For social indigenoes people for research we used our background knowledge
- After lunch for reading we read a book not on our chromebook
