

Smarter ways to travel for the environment and you!!!!

...

Introduction

Hello today I will be talking about smarter ways to travel for you and the environment.

Smarter ways to travel

For you / Environment

- Walking
- Biking
- Scootering
- Canooing (If on water)
- Electric scooters
- Carpooling
- Electric cars

These ways are smarter for you and the environment because you are getting exercise and you are not releasing the bad gases from the car. And with carpooling you are releasing less bad gases, and with electric cars there is no bad gases

But why?

You should use these smarter methods of travel because it is good for our planet which is being affected by the bad gases from cars

Things that YOU can take part in

Peterborough Pulse is an event in July where the streets of downtown Peterborough to a no car zone to promote healthy and active living!!!!

<http://www.ptbopulse.com/>

Why should you do this?

You should do this because our planet is not doing good and the bad gases being released from cars is making it worse

Conclusin

Thank you for watching this presentation and I hope you are now smarter with your transportation
