

NEW TRANSPORTATION

PRESENTATION BY ZAVE AND
WILL

全新BMW i8

THE NEW TYPES OF TRANSPORTATION ARE...

ELECTRIC CARS, HOVER CARS, GARBAGE
FUELED CAR, AND MONO RAIL TRAINS

PROS AND CONS OF ELECTRIC CARS.

PROS

Electricity costs less than gasoline.

Maintenance is needed less often

Eco friendly

They're very quiet

Does not pollute when in idle

You're likely to get tax credit

There are zero emissions

➤ CONS

- **Electric cars have a shorter range of driving time**
- **More expensive**
- **Hard to find chargers**
- **Not as many choices**
- **The electricity is not free**
- **They have less space**

IF YOU CAN'T AFFORD A ELECTRIC CAR

- you have a pair of feet
- you can start car pooling
- You can rent e bikes and transportation

ALL ABOUT E BIKES

- The average price of an electric bike is somewhere around 400---4000
- E bikes use rechargeable batteries that can travel up to 25 to 45 km h
- If the battery runs out you can still ride it
