## Carpooling

Hi we are In grade 8 and we are doing the classroom energy challenge and we decided to Carpool ``

- Carpool is people that drives together than using one or more car so that more people than one person can drive and prevents the needs for others to have to drivers to a location themselves.
- Carpooling is driving your friend using your car or the opposite your friend using their car.
- The benefits of carpooling is (1)reductions in energy consumption and emission, (2) congestion mitigation, (3) reduced parking infrastructure demand.
- We got our information from this link from [Carpooling](#)
