

Community Connections

A decorative graphic on the left side of the slide. It features several stylized green leaves of various sizes and orientations, some overlapping. Interspersed among the leaves are several light grey circles of different diameters. The overall aesthetic is clean and modern, suggesting a focus on nature or sustainability.

What We're Doing

Our task: Create or join an energy initiative in our community

What We're Doing

We plan to educate the school about energy and how it affects our environment with a spirit-day of sorts, where each class completes activities about energy.

For every activity completed, \$10 will be donated to The Women's Crisis Services of Waterloo Region, hopefully sponsored by the school.

What You're Doing

Make activities. Yay!

Group Topics

- Conserving Energy
- Recycling
- Phantom Power
- How People Make Energy
- Renewable Energy

Activity Criteria

- Activity should take 10-15 minutes including video instructions
- Activity must involve the creation of something, whether it be physical or digital
- Manageable to set up school wide
- Resources for the activity must fit on 1 Google Slide
